

Daud Hidayat Ramadhan

Backend & Security Engineer | DevSecOps · Cloud | Go · K8s · GCP

+6285718036517 | daud28ramadhan@gmail.com | linkedin.com/in/daud-hidayat-ramadhan | github.com/DaudHidayatR | Yogyakarta, Indonesia

Professional Summary

Backend & Security Engineer building microservices, securing CI/CD pipelines, and managing cloud infrastructure. Graduate of Bangkit Academy 2024 (Cloud Computing) and IDCamp 2024 (DevOps Engineer — Expert). Promoted from Software Developer intern to Security Engineer (Contract) at BSI UII. I bridge development and infrastructure through Go, PHP, Kubernetes, Ansible, and OpenBao. Open to backend/DevSecOps/cloud opportunities.

Technical Skills

Backend: Go (Golang), PHP, REST APIs, Microservices

DevSecOps: Docker, Kubernetes, Ansible, OpenBao, CI/CD, Linkerd, SAST, Dependency Scanning, Secret Scanning

Cloud & Infrastructure: Google Cloud Platform (GCP), Linux, Nginx

Languages: JavaScript, SQL, Bash

Tools: Git, GitHub, GitHub Actions, Postman, Jenkins, GitLab CI

Work Experience

Security Engineer — SOC/CSIRT Team (Contract)

Jan 2026 – Present

Badan Sistem Informasi UII

Yogyakarta, Indonesia

- Researched and prototyped Secure SDLC practices, establishing secure coding standards and automated security testing checkpoints for 7 development teams, reducing reliance on manual pre-deployment reviews
- Built DevSecOps CI/CD pipeline integrating 4 automated scanners (SAST, dependency scanning, container scanning, and secret scanning) across 2 repositories, automating security validation in deployment workflows
- Produced technical documentation and rollout roadmap enabling development teams to self-service security checks and reducing deployment bottlenecks

Software Developer — Internship

Jan 2025 – Dec 2025

Badan Sistem Informasi UII

Yogyakarta, Indonesia

- Maintained and enhanced legacy KUI scholarship service back-end, supporting disbursement operations for 500+ students across 5+ programs and stabilizing performance for production scholarship workflows
- Developed REST API endpoints for student scholarship applications, handling core business logic and finance system integrations that streamlined the application-to-disbursement workflow
- Automated domain unblock workflow using Google Apps Script, replacing 3–5 manual email requests per week with a self-service form that eliminated response delays and reduced SOC/CSIRT operational overhead

Certifications

IDCamp 2024 — DevOps Engineer (Expert)

Jan 2025

Bangkit Academy 2024 — Cloud Computing

Jul 2024

Google IT Support Professional Certificate

Mar 2024

Education

Universitas Islam Indonesia

Yogyakarta, Indonesia

Bachelor of Informatics, GPA 3.70/4.00

Aug 2021 – Jan 2026

Projects

Security Scanning Orchestrator | Cloudflare Workers, TypeScript, D1

[GitHub](#)

- Serverless pipeline receiving GitHub webhooks, normalizing multi-scanner reports (Trivy, Gype, GitLeaks, Semgrep) into unified D1 schema with tiered alerting (Telegram/email).

Self-Hosted DevSecOps Platform | Kind, Istio, OpenBao, Kustomize

[GitHub](#)

- Kind cluster on personal VPS with Istio service mesh and OpenBao secrets. Dual-scan pipeline (raw-file + rendered-manifest) with SBOM generation (SPDX + CycloneDX).
